

MISSION STATEMENT

“Quality Products, Quality Service, Quality Relationships”

At National Forest Products we truly believe that these qualities are the basic fundamentals of success; for our company and our customer. We strive each day to settle for nothing but the best!

Message from our President...

Our vision is to be the best at what we do! We will be a quality company with quality people and quality products; a company that will interact with it's customers to enhance each other's businesses. Our customers value quality as the first criteria in marketing their products.

Our goal is to be trusted that we stand behind all our products to ensure ultimate customer satisfaction. We have strategically placed people geographically with extensive knowledge and experience to ensure our standards are met.

We have and will continue to set ourselves apart from the competition when it comes to quality, service and support. We represent quality from our suppliers, quality from us and quality for our customers. Quality, quality, quality is synonymous with National Forest Products.

Working together I am confident we will achieve this vision!

Dan Plouffe
President
