Before buying "Pinnacle" brand from National Forest Products, I struggled to find consistent quality in my cedar. The quality from other sources was unpredictable. Poor quality led to more waste and less profit. High quality "Pinnacle" cedar has reduced the number of returns, exchanges, and irritated customers. Positive feed back and repeat customers tells me that I now have the highest quality available. In my mind its' a win-win situation. The customers are happy and get value for their dollar and the dealer puts more on their bottom line. National Forest Products has the full line of "Pinnacle" cedar. I have been very pleased since switching all my cedar requirements to National Forest Products. I think you will be pleased as well
