LETTER OF REFERENCE

APRIL 17 2007

To Whom It May Concern:

Our company was established in 1978 and sole proprietorship by TBLSL in 1984. We specialize exclusively in Western Red Cedar building supplies and accessories, specifically decking, fencing, siding, and roofing products.

One thing we realized right from the beginning was that our customers, both the contractors and do it your-selves were extremely concerned about the quality of the products they were purchasing for their projects....simply put...they wanted the best.

As hard as we searched it just seemed that we couldn't find a high enough grade to satisfy their demands. At the time we were dealing with several suppliers and it was Dan Plouffe from National Forest Products and his team who paid attention to our needs. They went to the mills and log suppliers and convinced them to produce the product that we and many others were looking for...a premium four square, tight knot, no hole, wane-free, virtually perfect piece of wood known today as the "Pinnacle" grade.

Well that was almost 10 years ago and since that time the feedback from our customers continues to be positive and they have grown to rely on us to supply them with the premium products they demand.

If your in the cedar business and require the highest quality of both products and service, we would recommend National Forest Products. They posses the expertise in the industry that we require to continue to be successful in our market place.

Sincerely,
Tim Braun
